

# ADD ASSET WITH COMPONENTS

# ADD ASSET WITH COMPONENTS

1

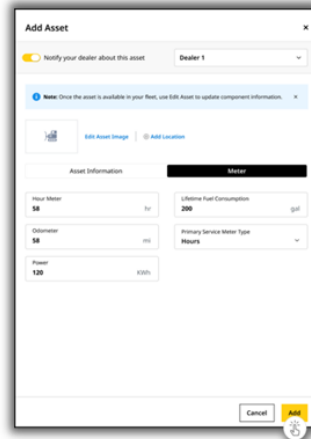

Select the **Assets** page.  
Next, select the **Add Asset** button.

Add Asset

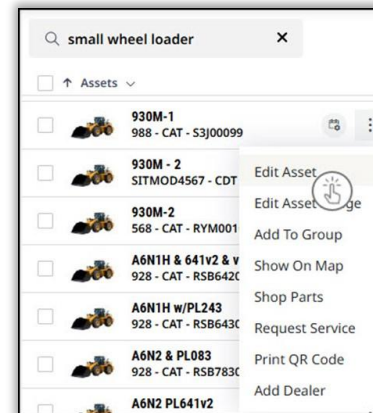

2

Complete the **Asset Information** tab fields and the **Meter** tab fields. Then select **Add**.

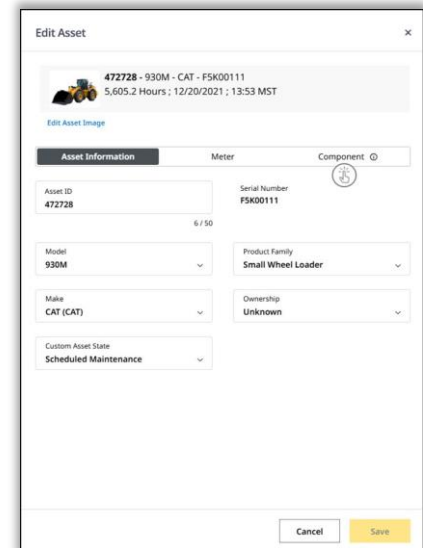

3

Once the asset is visible in your fleet from the **Assets** page, find the newly added asset and select **Actions menu > Edit Asset**.

4

Select the **Component** tab.

# ADD ASSET WITH COMPONENTS (CONT.)

5

Select **Add Component**.

The screenshot shows the 'Edit Asset' interface. At the top, it displays asset details: '472728 - 930M - CAT - F5K00111' and '5,605.2 Hours ; 12/20/2021 ; 13:53 MST'. Below this, there are three tabs: 'Asset Information', 'Meter', and 'Component'. The 'Component' tab is currently selected and highlighted in dark grey. A search bar labeled 'Find component' and an 'Add Component' button are visible at the bottom of the screen.

6

If this is a Cat Make, search for the component.  
If this is a Make other than Cat, you can create a new component.

The screenshot shows the 'Add Component' search results. The search term 'braking' is entered in the search bar. The results list three items: 'Braking System', 'Braking Left Rear', and 'Braking System Right Rear'. Each item has a small icon next to it.

OR

The screenshot shows the 'Add Component' form for creating a new component. The 'Create a new component' toggle is turned on. The form includes fields for 'Enter Component Name' (with 'Additional component' entered), 'Component Type' (set to 'Engine - Diesel'), and 'Sample Type' (set to 'Oil'). There are 'Cancel' and 'Add' buttons at the bottom.

7

Complete the fields and select **Add**.

The screenshot shows the 'Add Component' form with all fields filled out. The 'Component' dropdown is set to 'Select Component'. The 'Create a new component' toggle is on. The 'Enter Component Name' field contains 'Additional component'. The 'Component Type' dropdown is set to 'Engine - Diesel'. The 'Sample Type' dropdown is set to 'Oil'. The 'Add' button is highlighted in yellow.

8

Once you see the success message, select **Save**.

The screenshot shows the 'Edit Asset' screen with a success message: 'Component added successfully'. The asset details are updated to '5,605.2 Hours ; 12/20/2021 ; 13:53 MST'. The 'Component' tab is selected. The 'Braking System' component is added to the list. The 'Save' button is highlighted in yellow.
